

U TRACK HYDRO CIRCAL®

The U Hydro CIRCAL®, found in our curtain track portfolio, is made of minimum 75% recycled aluminium. The track is manufactured locally in Vetlanda (Sweden) with low emissions during the process. The appearance is identical to the original Luxaflex® U track, used for lighter curtain suspensions. Easy mounting with snap function. The track is also available with holes punched, for installation directly in the ceiling, used for medium heavy curtain suspensions. Used with a variety of different gliders, both regular and glider on cord.

- Material: aluminium
- Color: white (RAL 9016), black (RAL 9005) and grey (GSHIMMER-168)
- Manufacture: produced and extruded by Hydro, Sweden
- Operation: manually
- Length: 6000 mm without joint
- Mounting: ceiling, wall, niche and pendant
- Bending: angle and round
- Textile weight: light (max. 3 kg per 6 m track)/medium (holes punched track, installed in ceiling)
- Silicone treated
- Optional: hole punched track (on the side) for easier insertion and removal of the gliders

ASSEMBLY

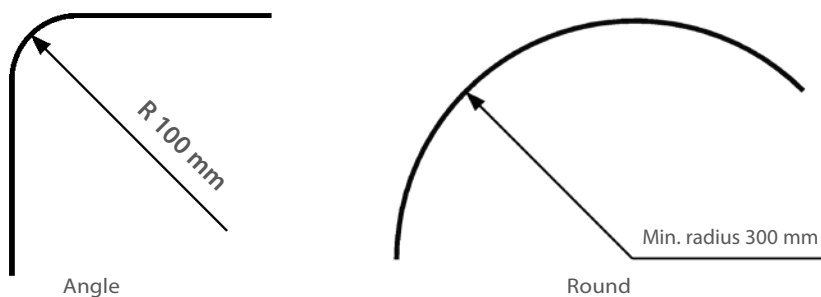

Distance between brackets max 800 mm.
Extra holders/brackets are recommended where the curtain is parked, when not in use.

Recommended distance if holders are used together with brackets:

- 800 mm with 50 mm holder
- 600 mm with 100 mm holder
- 600 mm with 150 mm holder
- 600 mm with 200 mm holder

Bending

The track can be bent into complicated shapes, even in combinations of angle and round bending. Contact Customer Service for more detailed information.
