

AIR TRACK HYDRO CIRCAL®

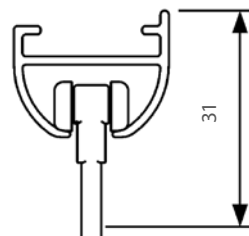

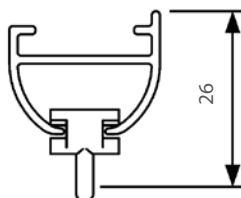

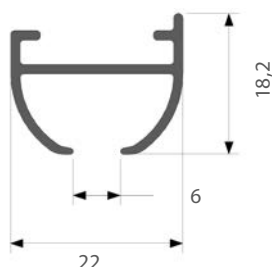

The Air Hydro CIRCAL®, found in our curtain track portfolio, is made of minimum 75% recycled aluminium. The track is manufactured locally in Vetlanda (Sweden) with low emissions during the process. The appearance is identical to the original Luxaflex® Air track, used for most curtain suspensions, from medium to heavy. Easy mounting with twist bracket. Used with a variety of different gliders, both regular and glider on cord.

- Material: aluminium
- Color: white (RAL 9016)
- Manufacture: produced and extruded by Hydro, Sweden
- Operation: manually
- Length: 6000 mm without joint
- Mounting: ceiling and wall
- Bending: angle and round
- Textile weight: heavy (max. 8 kg per 6 m track)
- Optional: hole punched track for easier insertion and removal of the gliders

TECHNICAL INFORMATION

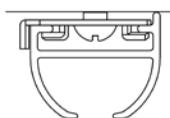

Profile

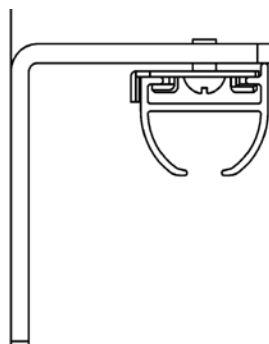

measure in mm

Mounting

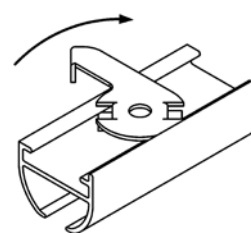

CEILING

WALL

ASSEMBLY

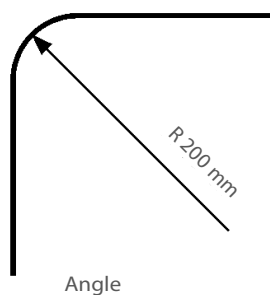

Distance between brackets max 1000 mm.
Extra holders/brackets are recommended where the curtain is parked, when not in use.

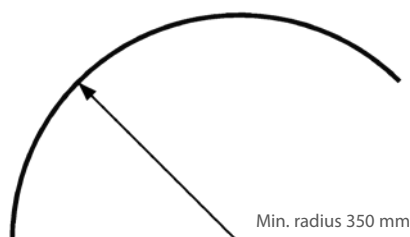

Recommended distance if holders are used together with brackets:

- 1000 mm with 50 mm holder
- 800 mm with 100 mm holder
- 600 mm with 150 mm holder
- 500 mm with 200 mm holder

Bending

Angle

Round

The track can be bent into complicated shapes, even in combinations of angle and round bending. Important! Front and back need to be specified on drawing/order. Contact Customer Service for more detailed information.
